EXPERIENCE

Software Engineer Intern

Flintec Transducers (Pvt) Ltd 📅 Jun-Dec 2024 📍 Katunayake,Sri lanka

Developed an Issue Management System, reducing resolution time by 60%, automating workflows, and improving collaboration using C#, ASP.NET Core, SQL.

Software Engineer Trainee

ACPT Institute 📅 Jan-Jun 2024 📍 Wadduwa,Sri Lanka

Gained experience in full-stack development, including coding, testing, debugging, and developing web and mobile applications using Java, JavaScript, React.js, React Native, HTML, CSS

PROJECTS

Goods Outwards System

🔗 Private Repository

Developed the system which handle the goods outward process and gain access control for different type of users. Technologies: ASP.NET Core MVC, C#, Bootstrap, MS SQL

Issue Management System

🔗 Private Repository

Developed the system which handles and displays issues occurred in production lines under four categories using ASP.NET, C#, Bootstrap, MS SQL, Raspberry PI

CC1w-V2-wifiboardTest

🔗 GitHub Link

Developed the system which handles and displays Multimeter with CC1W-V2 board and checking resistor values using ASP.NET Web Forms, C#, MS SQL

KidzKindle Donation Web Site

🔗 Private Repository

This website is built for children. This is similar to an e-commerce web site and users can donate money as well as select products and add them to a cart like in an e-commerce website. Technologies: MERN stack

T2T Trace Program - Nagarro

🔗 GitHub Link

This is the first project given to us by Nagarro and our project is to build a book store Web site. Technologies: MERN stack

Order Management System

🔗 GitHub Link

This contains user register, login, forgot password facilities as well as insert order details, check insert and claim invoices, emails sending services and notification sections. Technologies: React Js, Bootstrap, Firebase and JavaScript

EDUconnect Web Application

🔗 GitHub Link

Developed EDUconnect, an educational web app for course tracking, community discussions, notifications and settings using React, Bootstrap, PHP, SQL, Firebase.

MediME Android Mobile Application

🔗 GitHub Link

Developed medical reminder android application. It include medical reminder alarm, temperature part, walking steps counter, google map with multimedia section using android studio (java , mysql database)

SUMMARY

I am a highly motivated and dedicated IT enthusiast currently pursuing a Bachelor Of Software Engineering Honours at Open University. With hands-on experience in software development, I am looking to apply my skills and learn new technologies. Passionate about problem-solving, writing clean and efficient code, and contributing to software solutions. I work well in a team and always strive to improve my technical knowledge.

EDUCATION

Bachelor of Software Engineering Honours

2021 – Present
GPA – 3.3 (Present)
The Open University Of Sri Lanka

Successfully Completed High School examinations

2011 – 2019
H/Rajapakshe Central College Weeraketiya

CERTIFICATION

- SLASSCOM: Fundamentals Track, Software development Track and Customer Service Track of Future Careers Bridge
- University Of Moratuwa: Web Design for Beginners & Python for Beginners

SKILLS

ASP.NET	C#	java	React js
JavaScript		SQL	MS SQL
React Native		Express Js	Laravel
Mongo DB		Bootstrap	CSS
SpringBoot		Azure	AWS
FireBase		Raspberry Pi	
Git	Git Hub	HTML
